address details.

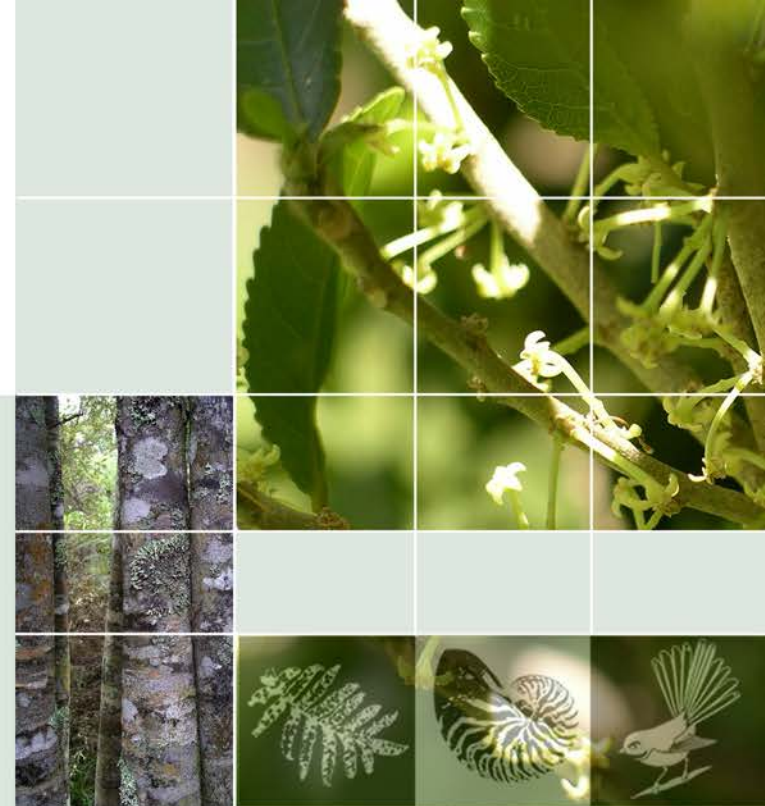

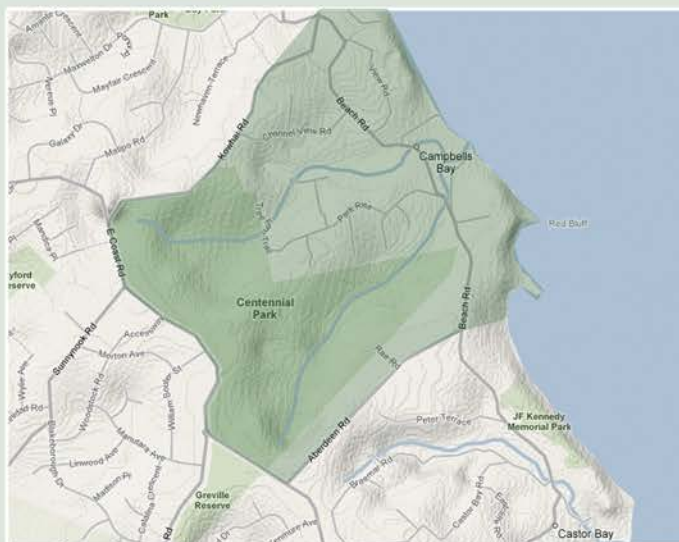

Structure and funding

To keep costs down Centennial Park Bush Society Inc will be the CBUS parent body. Bush Society will apply for grants from environmental initiative funds, charities and councils and will welcome donations.

"He serves his country best, who loves the land itself."

-- Sir Charles Fleming, New Zealand scientist and conservationist.

Site Location

*Campbells Bay
Urban Sanctuary*

THE NATURE OF HEALTH

**NZ's favourite natural health brand and
North Shore citizens for over 40 years.
Proud to play our part in preserving the
natural environment in our own backyard.**

What is CBUS?

With a park at its heart, two streams, a beautiful beach and pockets of privately-owned native bush Campbells Bay is already an urban wildlife haven. To help keep it that way, your Bush Society has founded CBUS -- Campbells Bay Urban Sanctuary, a community environmental scheme designed to embrace the bay's natural assets and help enhance, protect and promote them. CBUS is your chance to hop aboard and participate by eliminating weeds, improving water quality and planting natives.

It's a partnership

Residents, Centennial Park Bush Society, Pupuke Golf Club, North Shore City Council, Takapuna Community Board, Mairangi Playcentre, All Hallows Church, Campbells Bay Tennis Club, Waicare, Auckland Regional Council, Campbells Bay Residents and Ratepayers Association – we're all in this together.

CBUS covers...

...the area bound by Aberdeen, East Coast and Kowhai Roads and the beach. This green "island" has already been identified as an important link in the Northwest Wildlink chain of bush remnants, connecting the islands of the Hauraki Gulf to other North Shore reserves and the Waitakere Ranges. Conserving Wildlink's green chain is essential for the safe passage of native birds around our region.

How can you help?

By becoming weed-busters and water-watchers. Birds spread weed seeds and so do thoughtless gardeners who dump green waste on park perimeter areas. Weed eradication in our gardens is essential if we are to win the weed battle in the park. Large native trees on private land are treasures – they provide bird food and seeds for native regeneration.

Much of our stream water starts in our backyards. Remember: keep it clean for the stream.

We need hands-on help at working bees. Donations (yes please!) are tax deductible.

Park Rise Bush

Bush Society volunteers have been restoring native bush in Centennial Park for 30 years. The results are stunning. A key CBUS initiative is the reforestation of the weed-infested five-hectare area at the top of Park Rise. Eventually Bush Society envisages a walking track and aerial walkway through to Kowhai Road. Community backing and hands-on help are vital if this challenging project is to succeed.

CBUS aims to:

- Involve all stakeholders in a positive way
- Increase the bay's bird life
- Improve stream and beach water quality
- Safeguard the health of bush remnants and enhance the beauty of our bay by busting the weeds
- Raise awareness of which plants are pests and encourage their removal and replacement with non-invasive, bird-friendly natives and exotics
- Manage animal pests like rats and possums
